

AARAMBHA 2022-23

First -year student induction program was held. During orientation week, students are exposed to a range of exercises and activities designed to foster their unique growth and spark their creativity. Throughout the week, the students are scheduled for a variety of group activities. Openness is the essence of design. A Receptive mind is a sponge soaking new ideas and ready to collaborate - creating a new synergy. Architecture, being a new concept in their life, a proper Orientation is needed. They need to be receptive enough to take and acknowledge new ideas.

Site Visits Conducted for first Year students.

Second-year students were given the opportunity to visit a site and engage with renowned architects in the field. Their practical understanding of construction technologies and materials is enhanced by these visits

Visits to industry and ongoing construction sites to provide them with information about what happens during construction for third-year students.

Site Visits Conducted for Fourth Year students.

Individually or in groups, students present their case study work to the lecturers and other students in a presenting format.

A bamboo workshop was conducted as a vertical studio for understudies from First to fifth year. this workshop made a difference the students to get it bamboo as a material.
